

Midst Table w. Power cut-out

“Midst Table is a meeting between the poetic and functional. The name refers to the center and the table being a gravitational point, while its round shape cancels out hierarchy — there is no head of the table. Its shape naturally draws us in towards its middle, encouraging a meeting of minds and eyes. Our design process was one of subtraction and refinement. The Midst Table’s form and construction was inspired by an iconic architectural feature, the column, merging physical stability and steadfastness with a sense of elegance.”

— TAF Studio

Designed by	TAF Studio
About the Designer	TAF Studio is a Stockholm-based design and architecture studio, founded by Gabriella Gustafson and Mattias Ståhlbom. The duo works within product and interior design.
Environment	Indoor
Country of Production	Sweden
Preassembled	No - Mount frame to tabletop.
Description	The Midst Table w. power cut-out is as an ideal meeting point in any professional space, offering a spacious, round surface perfect for collaboration and discussion. Its elegant design is both simple and distinctive, highlighted by unique detailing and a mix of materials—choose from nanolaminate or linoleum—set upon a monolithic spun steel base with a high-gloss finish. The table includes a central circular cut-out for seamless power unit integration. Add the appropriate Pandora power unit to finalize the setup.
Material	The tabletop is available in lacquered MDF with black nanolaminate top or lacquered MDF with a linoleum top. Nanolaminate tabletops are made using FSC™-certified (FSC-C028824) wood. The table base is made of powder-coated steel with a protective rubber ring under it. Steel is an alloy of iron and carbon. Powder-coated steel has a subtle, textured expression and elegant feel while adding durability to the design and making it more corrosion- and chip-resistant. All power outlets are plastic and come in EU, UK, and US variants.
Cleaning & Care	Clean the tabletop with a damp cloth. If necessary, only use a mild detergent or washing-up liquid; never concentrate. Always wipe with a dry cloth afterward. Liquid, grease, etc., should be removed immediately to minimize the risk of stains and marks. Linoleum care is recommended 2-3 times a year for optimum saturation of the natural material. Clean the base with a microfiber cloth to avoid scratching the high-gloss lacquer. Use a small amount of mild dish soap on the cloth if necessary. Always turn off the power when cleaning the power outlet. *Muuto recommends that you contact your local hardware store for advice on oils for indoor use.
